PROJECTS

Qloset | Full-stack modern E-Commerce Platform (Project of 3)| Live Demo |Github Repository | DECEMBER 2025

- Designed and implemented a responsive e-commerce user interface using React and Tailwind CSS, developing reusable UI components and dynamic product pages to ensure smooth navigation and an intuitive shopping experience across product variants.
- Developed RESTful backend services using Node.js, Express and MongoDB, by designing and implementing APIs for product management, inventory updates and order processing with reliable transactional data flow between client and server.

Spotify Playlist Analyzer | Full-stack Music Analytics Platform| Live Demo |Github Repository | OCTOBER 2026

- Built a full-stack Spotify playlist analytics app using React and Tailwind CSS, featuring OAuth 2.0 authentication via Passport.js, genre and audio-feature analysis, duplicate detection, and similarity-based recommendations.
- Integrated Spotify, Last.fm, and ReccoBeats APIs, engineering a custom weighted similarity algorithm that combines audio features with genre tags to surface related tracks.
- Containerized the Node.js backend with Docker and configured GitHub Actions CI, running against MongoDB Atlas for storage and Redis Cloud for session persistence.

PostIt | MicroBlog |Live Demo |Github Repository | OCTOBER 2024

- Built a responsive micro-blog using Next.js 15 and TypeScript.
- Managed server state and caching with TanStack Query (React Query).
- Designed a modern UI using Tailwind CSS v4.
- Implemented secure OAuth 2.0 Authentication using NextAuth.

PROFESSIONAL EXPERIENCE

Freelance IT Tutor | MARCH 2023–JUNE 2023

- Improved students' Microsoft Word proficiency, reflected by their readiness for national promotional examinations, by delivering structured one-to-one lessons.
- Adapted technical explanations to help students master Word features under time constraints.
